

Welcome to the AUGIS 2017 Event App – this app will allow us to collate information to be used as part of the conference. The app is where you can view the programme, see who's attending and access documents used in the Annual Scientific Meeting. In order to do this, you will need to download the application onto your mobile/tablet device.

Your data will be collected by our Event App production company mclcreate on behalf of AUGIS and will be used solely for this conference. We will not share your data with any third parties.

Mobile app - Installation Guide
