Dear colleague

Information needs of patients undergoing curative treatments for oesophageal cancer

We are really interested in this information because we hope to identify the minimal core information that patients need, and therefore we are looking at everyone's practice to start off with.

We would be very grateful if you can send us a copy of the written information that you give to patients undergoing potentially curative treatments for oesophageal cancer. We are also interested to know which hospitals you cover, so that you are only contacted once. We would be very grateful if you could complete the reply slip and return it with your information, either electronically or by post.

If you would like any further information please do not hesitate to email Jane Blazeby, who will be pleased to help you.

We look forward to hearing from you.

Yours sincerely

Jane Blazeby MD, FRCS (Gen. Surg)
